

```
tml::impl::function  
_signature_holder< R,  
  ARGS...>
```

A diagram showing two C++ function signature boxes. The top box is white and contains the signature for `tml::impl::function_signature_holder`. The bottom box is gray and contains the signature for `tml::impl::function_signature_extractor`. A blue arrow points from the bottom box to the top box, indicating that the bottom class inherits from the top class.

```
tml::impl::function  
_signature< F >::signature  
_extractor< R(C::*)(ARGS...) const >
```
